

January 27, 2003

Dear Dallas County Dental Society Members:

As we move into the 21st century, Dallas Dental Services, Inc., the wholly owned subsidiary of Dallas County Dental Society, would like to remind you of a valuable new service that uses state-of-the-art technology to allow you to focus on patient treatment.

With this technology, dentists can collect their receivables each month for services for which patients pay in installments on a consistent, dependable basis via paper transactions that can be moved electronically through the banking system to accelerate your cash flow and collections. This is much less expensive and time consuming than mailing out invoices each month, and your patients will appreciate the convenience of not having to send a check.

There may be many products and companies that claim to have the ability to help your cash flow and profits, but most of them are not interested in small businesses like ours.

However, Dallas Dental Services found one company that is. American Bank Draft Systems is interested in helping entrepreneurs like dentists participate in this high tech age without sacrificing the personal touch of small business operations.

American Bank Draft Systems is dedicated to automated payment and cash flow acceleration, and they are interested in making this technology work for you. They can give you the personal dedication and service that you deserve; every account, regardless of size, is important to them. Many of your colleagues have already begun enjoying the great benefits of American Bank Draft Systems. Please call for references.

Please take the time to read the information provided by American Bank Draft Systems and find out how they can benefit your business and profits. You may contact American Bank Draft Systems at (972) 304-6398. Please call as soon as possible.

Sincerely,

W. Keith Thornton, DDS
President
